EXECUTIVE SALES PERFORMANCE OVERVIEW

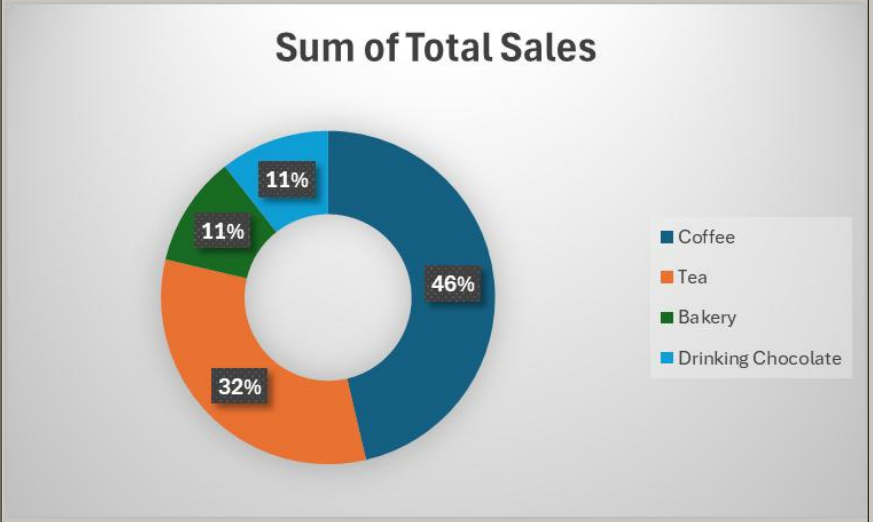
Summary of key sales metrics and business achievements for Bright Coffee Shop Chief Executive Officer

EXECUTIVE OVERVIEW

- Sales Performance Summary
  - High-level overview of sales across products and stores highlights revenue drivers and inefficiencies.
- Peak Demand Periods
  - Sales peak during specific time windows, indicating opportunities for staffing and promotions optimization.
- Product Category Insights
  - Beverages like Coffee and Tea lead sales, with Bakery and Drinking Chocolate as important supporting products.
- Localized Store Variations
  - Each store shows unique demand patterns, emphasizing the need for tailored local strategies.

TOTAL SALES BY PRODUCT CATEGORY

Product Category	Total Sales
Coffee	2037.5
Tea	1421.7
Bakery	471.0
Drinking Chocolate	466.0
Grand Total	4396.2



SALES BY STORE LOCATION

Balanced Store Contributions

Astoria, Hell's Kitchen, and Lower Manhattan all contribute meaningfully without one dominating revenue.

Beverage Sales in Hell's Kitchen

Hell's Kitchen leads slightly in beverage sales due to consistent demand throughout the day.

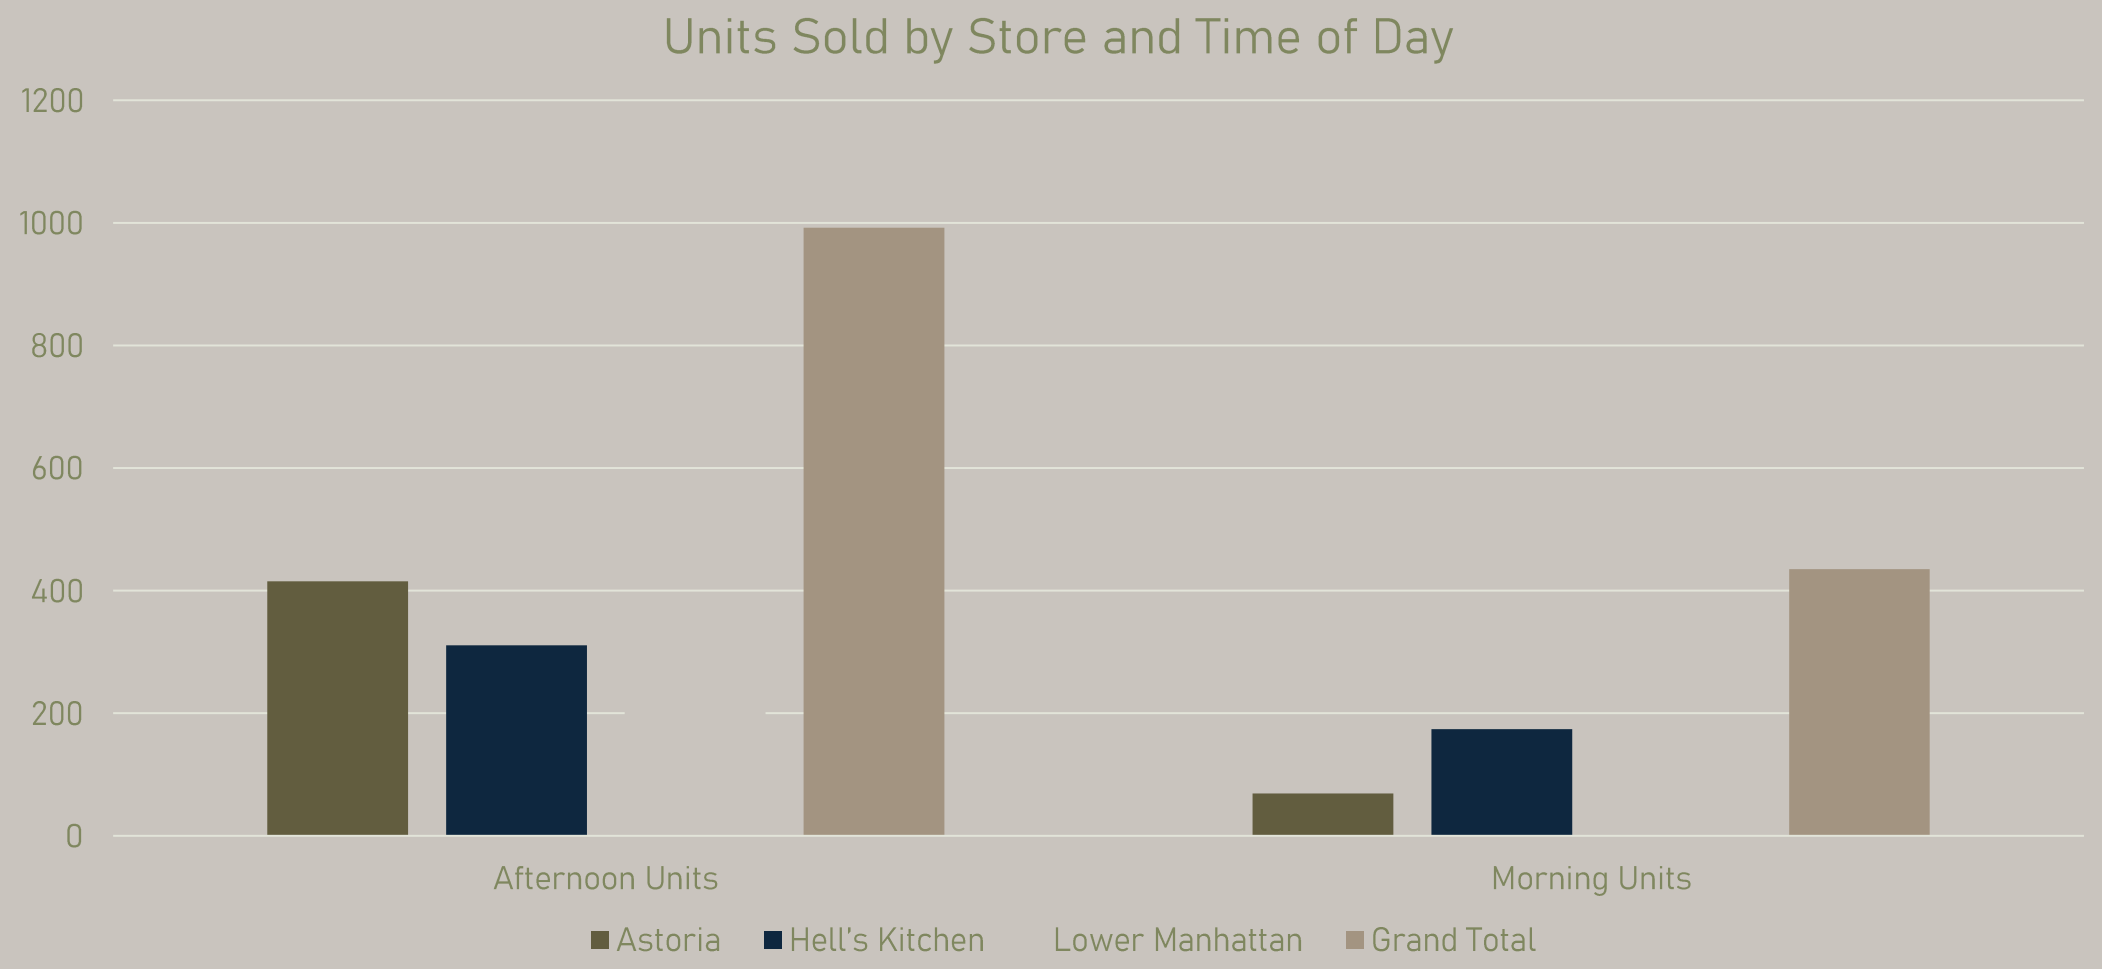
Early-Day Trading in Lower Manhattan

Lower Manhattan shows strong early-day sales driven by commuters valuing speed and convenience.

Tailored Store Strategies

Store-specific promotions and staffing optimize performance based on unique demand patterns.

OVERALL SALES BY TIME OF DAY



COFFEE PERFORMANCE INSIGHTS

- Sales Peaks Timing
  - Coffee sales peak consistently in the Afternoon and perform well in the Late Morning across all locations.
- Early Morning Demand
  - Lower Manhattan shows strong Early Morning coffee sales driven by commuters and weekday routines.
- Evening Sales Drop
  - Coffee sales decline noticeably in Evening and Night periods, especially outside Astoria.
- Strategic Focus
  - Focus on optimizing timing and premium offerings rather than expanding coffee categories to enhance revenue.

TEA PERFORMANCE INSIGHTS

Demand Patterns

Tea demand peaks during Late Morning and Afternoon, with sales dropping sharply at night, especially in Lower Manhattan.

Complementary Role

Tea benefits from complementing Coffee sales rather than independently driving traffic across stores.

Strategic Growth Opportunities

Bundled offers and targeted Afternoon promotions can boost Tea sales and increase average transaction value.

BAKERY & DRINKING CHOCOLATE INSIGHTS

Time-of-Day Sales Sensitivity

Bakery sales peak in the evening, especially in Astoria and Lower Manhattan, reflecting discretionary snack behavior.

Drinking Chocolate Night Strength

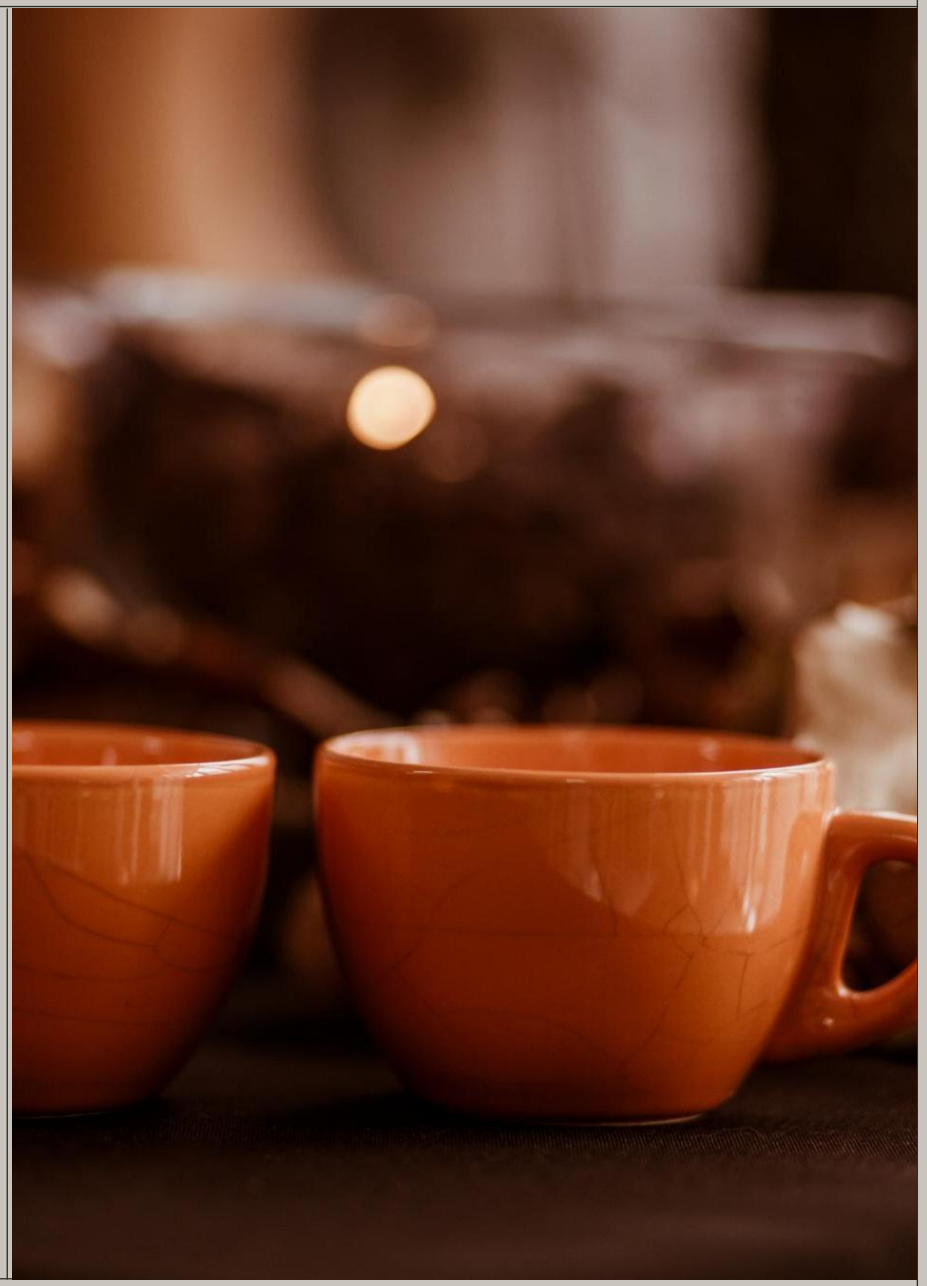
Drinking Chocolate performs strongly at night in Astoria, outperforming other locations during late hours.

Targeted Production and Promotion

Align bakery production with evening demand and promote Drinking Chocolate during cold or late periods to reduce waste.

Strategic Product Management

Manage these items as margin enhancers and experience differentiators, not as core volume drivers.



KEY STRATEGIC OBSERVATIONS

Critical Afternoon Revenue

Afternoon represents the key revenue window requiring focused operational and commercial protection.

Time-Dependent Performance

Product performance varies with time, emphasizing the need for time-based decision-making.

Localized Store Optimization

Distinct demand profiles necessitate store-level customization over centralized approaches.

Opportunities in Underperformance

Underperforming periods like Night offer chances for controlled experimentation and growth.

ACTIONS TO IMPROVE SALES PERFORMANCE

Optimize Peak Hour Staffing

Prioritize staffing, speed, and product availability during afternoon peak hours to capture maximum demand.

Target Evening Promotions

Introduce targeted promotions for bakery and drinking chocolate in evening and night to boost weaker periods.

Store-Specific Strategies

Tailor sales strategies by store, leveraging strengths of different locations at various times of day.

Increase Transaction Value

Use bundling and cross-selling, pairing beverages with bakery items to increase average transaction value.

Continuous Performance Monitoring

Monitor sales performance continuously by time and store to enable rapid adjustments and sustained growth.
